

The New Postage Bill.

The new postage bill, in the amended form in which it has passed the Senate, is said to be a vast improvement on the existing law, and afford relief both to the people and to the postmasters from the misunderstanding which the present complicated system imposes.

1. By placing all printed matter upon the same footing, postmasters and the public will be able to decide the character of publications, whether newspapers or periodicals, and the postage to be charged upon them, without an appeal to the Post Office Department or the Attorney General.

2. Making three ounces the maximum, will embrace all the newspapers, and a vast number of valuable periodicals, which will be sent by mail, instead of private conveyances, and thus increase the revenue of the Post Office.

3. One ounce and a half will include all the weekly country papers sent within each State at half the price of the above. There is no sense whatever in limiting these papers to the State where published. Why not extend the limit, as on other papers, to three thousand miles? They are only half the weight, and therefore should have the same privilege.

4. The pre-payment of postage, either at the office where a newspaper or periodical is mailed or delivered, is a great convenience both to the publisher and the public, as the postage to Canada, &c., may be paid at the office of mailing.

5. The reduction of postage to one-half, when paid quarterly in advance, will be a great incentive both to publishers and subscribers to pre-pay their postage.

6. The objections to sending transient papers or periodicals which now exist, will be effectually removed by this Bill. Instead of pre-paying fifteen cents postage on the Journal of Commerce to California, it will be sent through the post office for two cents. Our California brethren and their friends will hail this change with pleasure.

LOOK OUT FOR SHARPER.—The Savannah Courier says that "a man by the name of Rollin or Rollins, on Monday picked up a 'green un,' and after introducing him to a well known personage, by the name of John Barleycorn, proposed a bit of a social ride. The three gentlemen went to Brown & Harris's stable, hired a carriage, and proceeded to Thunderbolt. After some time the aforesaid 'green un' and John Barleycorn got into a slight scuffle, when John laid him out as 'cold as a wedge.'

"Mr. Rollin, in the mean time, concluded that as his friend was a little rickety, he ought to take care of his valuables.—He accordingly took possession of his pocket book, containing about one hundred dollars, his gold watch, gold chain, and sundry other articles. As it was growing late, and his friend seemed to be very happy and quiet, Mr. Rollin concluded to return to the city, leaving John Barleycorn and the 'green un' to settle their own difficulties.

"Having arrived at the corner of Bryan and East-Broad streets, Mr. Rollin suddenly remembered that he must transact some business near by. Accordingly he alighted, and ordered the driver to be particular and await his return. Cuffy tried to his duty, whistled, sang and puff 'till the 'wee sma' o' six,' when he began 'to smell a rat' and drove lazily home to the stable.

"On Tuesday morning the 'green un' returned to town in the private barouche of Mr. H. O. Segur. He wore a long beard and a still longer phiz. Having stated the facts to the proper authorities, the police were soon on the alert. In their investigations it was found that Rollins was the accomplice of the notorious Dr. Hines—that he was in the Charleston jail with him, and furnished with him arms, &c., prior to his late escape from the strong box in this city.

"The latest intelligence leaves us under the impression that the gentleman may again find an agreeable companion in the person of his old chum. We have not been able to ascertain Mr. Rollin's personal appearance. One thing is certain, he understands his business, and has made a monstrous good grab."

New Cotton.

Two bales of new Cotton were received here to-day, the first of this year's crop, from the plantation of Mr. J. A. Folk, Newberry District, and bought by Messrs. R. Cathcart & Co., at 10 1/2 cents. Quality, Good Middling.

Two more bales of New Cotton were received to-day from the plantation of A. F. O'Neal, Esq., at 10 1/2 cents. Quality, Fair. Palmetto State Banner.

Two bales of cotton of the new crop were received on Saturday by Messrs. Seafie, Hill & Co. This is the first in our market, and was received from Oglethorpe, Ga., via Savannah. It classed as good middling, and was sold a few minutes after its arrival at twelve cents.—Charleston Mercury.

A stranger died in this place on Saturday the 21st inst., who stated before his death, that he had murdered a man in some part of South America. He said his name was Young, was a tinner by trade, and said he was from Philadelphia.

Martin J. Picket, Esq., who we reported to have been shot, in Wadesboro, on Sunday the 22d inst., we learn from the Argus, lingered in the greatest agony until Tuesday morning, when he expired. Mr. Boyd is just awaiting a judicial investigation, which will take place before the Superior Court, in September next.

ANOTHER SHOOTING AFFAIR.—We understand the stage driver, on the route from this place to Fayetteville, was shot on his box, near Laurel Hill, by a young man by the name of McFarland. The wound, though severe, is not thought dangerous. The weapon was a double barrel shot gun.—Charleston Gazette.

IMPORTANT CONCERNING MR. WEBSTER.—The Boston correspondent of the New York Herald writes thus:—"A gentleman who visited Mr. Webster, while that great man was at Marshallfield, says that he discoursed with a great deal of freedom on public affairs, and particularly on the position held by himself. He was warm, and even bitter, on the injustice with which he supposes he was treated by the Southern members of the Whig National Convention, from whom he believes he had a large support. He did not hesitate to say, that he was now convinced that he made a mistake, when, in 1850, he took the Southern side of the question then in dispute, and that if he had taken an opposition course, he would now have been the candidate of a great Northern party, with fair chances of success. His feelings are perhaps natural under the circumstances; but whether he is wise in giving expression to them, or whether he rightly estimates what might have been, are points upon which each must judge for himself. He spoke, too, of retiring entirely from public life, to enjoy the sweets of Marshallfield—just as Scipio found at Litemum that happiness which was not procurable at Rome. From all that I could learn of his remarks on the aspect of affairs, it would seem that he entertains no doubts whatever of the election of General Pierce, and feels no particular interest in the fortunes of General Scott.

The Markets.

CHARLESTON, Sept. 3.—COTTON.—At the time of closing our last weekly review, we left the Upland market in a very languid state—the sales of the week then ending had been light, and prices unsettled, but of a drooping character. On Saturday, the first day of the week under review, not a single bale changed hands, while on Monday and Tuesday only 350 bales were disposed of, for want of buyers.

On Wednesday there was a considerable revival in the demand—confined, however, to only a few buyers; the sales reached near 1300 bales—prices stiffening and in favor of sellers. On Thursday, the demand became more general and active, and mostly of a speculative character. Upwards of 1850 bales were taken, at prices fully up to the range of our former and present quotations. The market yesterday remained comparatively quiet, the transactions amounting to about 200 bales. The total sales of the week have reached the aggregate amount of 3725 bales, at prices varying from 8 to 12 cents. We retain former quotations, with the remark on upward tendency of prices, and quote inferior to Good Ordinary, 10; Middling, 10 1/4; Fair to Fully Fair, 11; Choice, 12 cents.

COLUMBIA, Sept. 4.—COTTON.—The week just brought to a close has been a very dull one in the market for our great staple, Cotton. The late freshet has cut off all communication with Charleston, and also with the back country, consequently there is little or none coming to market, nor are buyers.

ANOTHER SCIENTIFIC WONDER.

Important to Dyspeptics.—Dr. J. S. Houghton's Pepsin, The True Digestive Fluid, or Gastric Juice, prepared from Rennet or the Fourth Stomach of the Ox, after directions of Baron Liebig, the great Physiological Chemist, by J. S. Houghton, M. D., Philadelphia. This is truly a wonderful remedy for Indigestion, Dyspepsia, Jaundice, Liver Complaint, constipation and Debility, curing after Nature's own Method, by Nature's own Agent, the GASTRIC JUICE. Pamphlets, containing Scientific evidence of its value, furnished by Agents gratis. See notice among the medical advertisements.

It should be universally known—for it is strictly true—that indigestion is the parent of a large proportion of the fatal diseases. Dysentery, diarrhoea, cholera morbus, liver complaint, and many other diseases enumerated in the city inspector's weekly catalogue of deaths, are generated by indigestion alone. Think of that dyspeptic! think of it all who suffer from disordered stomachs, and if you are willing to be guided by advice, founded upon experience, resort to an (don't delay a day) to Houghton's German Bitters prepared by Dr. C. M. Jackson, which, as an alterative, curative, and invigorant stands alone, and unapproached. General report, 120 Arch street. We have tried these Bitters, and know that they are excellent for the diseases specified above.—Philadelphia City Item. 23

ANOTHER SCIENTIFIC WONDER!

GREAT CURE FOR DYSPEPSIA.

DR. J. S. HOUGHTON'S

DR. J. S. HOUGHTON'S PEPSIN, the true Digestive Fluid, or Gastric Juice, prepared from Rennet, and the fourth stomach of the Ox, after directions from Baron Liebig, the great Physiological Chemist, by J. S. Houghton, M. D., Philadelphia, Pa.

It is truly a wonderful remedy for Indigestion, Dyspepsia, Jaundice, Liver Complaint, Constipation and Debility, curing after Nature's own agent, the Gastric Juice. Half a teaspoonful of Pepsin, infused in water, will digest or dissolve Five Pounds of Roast Beef, in about two hours.

Pepsin is the chief element, or Great Digestive Principle of the Gastric Juice—the Solvent of the food, the Purifying, Preserving, and Stimulating agent of the stomach and intestines. It is extracted from the digestive stomach of the ox, thus forming an artificial digestive fluid, precisely like the natural Gastric Juice in its Chemical powers, and furnishing a complete and perfect substitute for it. By the aid of this preparation, the pains and evils of Indigestion and Dyspepsia are removed, just as they would be by a healthy stomach. It is doing wonders for Dyspeptics, curing cases of Debility, Emaciation, Nervous Diseases, and Diabetic Consumption, supposed to be on the verge of the grave. The scientific evidence upon which it is based, is in the highest degree curious and remarkable.

SCIENTIFIC EVIDENCE. Baron Liebig in his celebrated work on Animal Chemistry, says: "An artificial digestive fluid, analogous to the gastric juice, may be readily prepared from the mucous membrane of the stomach of the ox, in which various articles of food, as meat and eggs, will be softened and digested, just in the same manner as they would be in the human stomach."

Dr. Combe, in his valuable writings on a "Physiology of Digestion," observes that "a diminution of the due quantity of the gastric juices is a prominent and all prevailing cause of Dyspepsia," and he states that "a distinguished Professor of Medicine in London, who was severely afflicted with this complaint, finding everything else to fail, had recourse to the gastric juice, obtained from the stomach of living animals, which proved to be perfectly successful."

Dr. Graham, author of the famous works on "Vegetable Diet," says: "It is a remarkable fact in physiology, that the stomachs of animals, immersed in water, impart to the fluid the property of dissolving various articles of food, and of effecting a kind of artificial digestion of them in no wise different from the natural digestive process."

Call on the Agent, and get a descriptive circular, gratis, giving a large amount of scientific evidence, similar to the above, together with reports of remarkable cures, from all parts of the United States.

AS A DYSPEPSIA CURE.

Dr. Houghton's Pepsin has produced the most marvelous effects, in curing cases of debility, emaciation, nervous decline, and dyspeptic consumption. It is impossible to give the details of cases in the limits of this advertisement; but authenticated certificates have been given of more than two hundred remarkable cures in Philadelphia, New York, and Boston alone. These were nearly all desperate cases, and the cures were not only rapid and wonderful, but permanent.

It is a great nervous antidote, and particularly useful for tendency to bilious disorder, liver complaint, fever and ague, or badly treated fever and ague, and the evil effects of quinine, mercury, and other drugs upon the digestive organs, after a long sickness, and so, for excess in eating, and the two frequent uses of ardent spirits. It almost reconciles health with intemperance.

OLD STOMACH COMPLAINTS.

There is no form of old stomach complaints which it does not seem to reach and remove at once. It matters not how long they may be continued, it gives instant relief! It is singular, and moves all unpleasant symptoms; and it only needs to be repeated for a short time to make these good effects permanent. Purity of body and vigor of blood follow at once. It is particularly excellent in cases of nausea vomiting, cramps, soreness of the pit of the stomach, distress after eating, low cold state of the blood, heaviness, lowness of spirits, despondency, tendency to insanity, suicide, &c., &c.

Dr. Houghton's Pepsin is sold by nearly all the dealers in fine drugs, and popular medicines throughout the United States. It is prepared in powder and fluid form, and in prescription vials for the use of physicians. Private circulars for the use of physicians, may be obtained of Dr. Houghton or his agents, describing the whole process of preparation, and giving the authorities upon which this new remedy is based. As it is not a secret remedy, no objections against its use can be raised by physicians in respectable standing and regular practice. Price one dollar per bottle.

Observe this! Every bottle of the genuine PEPSIN, bears the written signature of J. S. Houghton, M. D., sole proprietor, Philadelphia, Pa. Copy-right and trade mark secured.

Sold by Druggists and dealers in medicines. AGENTS.—HAILE & TWITTY, Lancaster C. H.; W. A. Morrison & Co., Winesboro; Dr. F. Curtis, Columbia; Dr. J. A. Reed, Chesterville; P. M. Cohen, Charleston.

NOTICE OF ELECTION.

Mechanics, Manufacturers and Inventors.

THE Eighth Volume of the SCIENTIFIC AMERICAN commences on the 18th of September. It is principally devoted to the diffusion of useful practical knowledge, and is eminently calculated to advance the great interests of industry—Mechanical, Manufacturing and Agricultural—the genius and master-spirit of the nation. It is unrivalled as a Journal of the Arts and Sciences, and maintains a high character at home and abroad.

The Publishers pledge themselves that the future volumes shall at least equal if not surpass their predecessors. Among the subjects chiefly brought forward and discussed in its columns are, Civil Engineering, Architecture, Railroads, Bridges, Agricultural Implements, Manufactures of Metals, Fibrous and Textile substances, Machinery for the purpose, Chemical processes, Distilling, Coloring, &c. Steam and Gas Engines, Boilers and Furnaces, Mathematical Philosophy, and Optical Instruments, Cars, Carriages, Water-wheels, Wind and Grinding Mills, Powers, Planing Machines, Tools for Lumber, Brick Machines, Farming, Fire Arms, Electricity, Telegraphs, Surgical Instruments, &c., besides Claims of all the Patents, Reviews, Notices of New Inventions, American and Foreign. The work is in form for binding, contains several hundred Engravings, over four hundred pages of printed matter, and a copious Index. Nearly all the valuable Patents which issue weekly from the Patent Office are illustrated with Engravings in its columns, thus making the paper a perfect Mechanical Encyclopedia for future as well as present reference.

Valuable Premiums are offered for the Largest List of Subscribers to this Volume. It is published weekly by MUNN & CO., at their Patent Agency Office, 128 Fulton St., New York.
